

Yokkaichi City will start

shipping new corona vaccination tickets to 12 to 24 years old from Monday, July 19th. (12 year olds will be shipped the month after their birthday.) When you receive the vaccination ticket, please read the enclosed instructions carefully and decide at home whether or not to receive a medical examination.※Vaccination is optional.

We would like to inform you about the information on the new corona vaccination in the current age of elementary and junior high school students.
We do not plan to inoculate in groups at school.

About vaccination for new coronavirus infection

Q 1. My child could only make a reservation during the daytime on weekdays. Will he/she be absent from

A. If a child is vaccinated at a medical institution, etc. it will be treated as 「suspension of attendance」and will not be absent.

Q 2. My child had a slight fever after vaccination with the new corona. Should he/she be

A. If you have a cold symptom such as fever after vaccination regardless of whether it is a side reaction, please refrain from going to school and follow up at home. You will not be absent due to suspension of attendance. If you have any other symptoms, please contact the medical institution in charge of vaccination and follow the instructions.

Q 3. Should vaccinations be required for students?

A. Vaccination is not compulsory. Some people cannot or do not want to be vaccinated due to physical or various reasons. Those who receive vaccination with the consent of their parents after understanding both the effects of infectious disease prevention and the risk of side reactions, school attendance and educational activities are not restricted by the presence or absence of vaccination.

【3 points for Infectious disease countermeasures】

From Ministry of Education, Culture, Sports, Science and Technology 『Hygiene Management Manual Ver.6』

(1) To cut off the source of infection	Do not bring in viruses from the outside!	◇If you have symptoms such as fever, do not force yourself to go to school and take a rest	When removing the mask as a measure against heat stroke, keep a sufficient physical distance.
(2) To break the infection route	Do not let the virus enter your body!	◇ Prevents droplet infection・・・Mask, ventilation ◇ Prevent contact infection・・・wash hands, do not touch eyes, nose, mouth	
(3) To increase resistance	Don't lose to the virus!	◇Sufficient sleep ◇Moderate exercise ◇ Balanced diet	

(1) and (2) tend to attract attention, but (3) is also an important point!
Spend the summer vacation with a regular life rhythm.

Please continue to observe your health during the summer vacation. If you feel unwell due to fever or cold symptoms, take a break from club activities and refrain from going out.

★ If your child or family member is going to be tested for new coronavirus infection, please contact us!

★ Please cooperate with your child's waiting at home until the test result is known!
